

Borgo Egnazia was built entirely of rough limestone and local stones cut by the skilled hands of stone masters. Artist and designer **Pino Brescia** was inspired by the simplicity of Puglia's ancient farmhouses and rural villages. It is a **contemporary interpretation of Puglian architecture**, providing three kinds of accommodation, different in scope and size, but all conceived as a harmonious blend of tradition and innovation, modernity and authenticity, grandeur and simplicity.

La Corte is the traditional main building, with **63 rooms** divided into different types. **The famous Borgo** is at the heart of the property with its entrance arches, narrow streets with Puglian names, the bustling square, fountains and the iconic clock tower. Here there are **92 different types of houses**, and finally there are **29 villas** with private gardens and pools that are perfect for families and for those who want absolute privacy.
